Urban Design

LYONS NATIONAL BANK BME was responsible for site planning and approvals for this urban redevelopment project. The project included development of a branch office of the Lyons National Bank, as well as leasable office space, parking, sidewalk improvements and the establishment of lawn and landscaped areas.

CANANDAIGUA MAIN STREET

BME provided the planning of landscape architecture and engineering services to the Canandaigua Streetscape project. We successfully coordinated the involvement with the NYSDEC, NYSDOT, City of Canandaigua DPW, RG&E, and business owners to carry out the approval.

NORTH PLYMOUTH TERRACE

This 27-unit infill townhouse development is located on property that was formerly a parking lot owned by the City of Rochester. BME's design plans included two blocks of townhouses and the implementation of a public pedestrian walkway.

PARK POINT @ SYRACUSE UNIVERSITY

This student housing project included construction of a multi-level 66-unit apartment building, as well as grading and sidewalk reconstruction along three existing street frontages. The privately owned and managed residential facility features a private lounge and gated courtyard, which is the site for a number of resident events throughout the year.
